

*Press release*

„ORA“ network was officially established on 16th and 17th July 2014. Representatives of 15 partner organisations, from different parts of Europe, have adopted and signed the network Statutes.

ORA is acronym for „Observe Rethink Act“. Network is organising and developing projects with objectives to promote sustainability through inclusion.

ORA idea was developed back in 2009., and as from then, 32 partner organisations have cooperated through 16 projects directed on building processes, development of methodologies and providing support for young people to become active citizens. In 2013 we have decided to formalise this cooperation and establish the network made of our associations.

In February 2014, we have developed the structure and contents of the network. During our meeting in Banja Luka, we have officially signed the documents for participation in the network.

In following period we will continue to work on establishment of internal and democratic life within the network, building the public relations, but mostly on development of future projects.

Meetings in Banja Luka and Oybin, during which the network was established have been supported through „Youth in action“ programme of the European Union.
